## Steps to Apply

Welcome to Avalon Montessori!

At Avalon Montessori our purpose is to maintain Montessori traditions while celebrating each child's individuality. Avalon Montessori is a premier educational facility providing exceptional child centered instruction. Our school offers a safe, beautiful and joyful space for young children to enjoy the extraordinary benefits of the Montessori Method.

Our mission is to nurture creative, compassionate & confident children. We aim to provide an environment that promotes diversity, self-discovery, and a love of learning while empowering all students to reach their greatest potential. Our curriculum is an integrative approach designed to encourage a child's innate analytical, creative, emotional and social intelligence.

Please feel free to contact our Assistant Director, Bridget Smith, at (334) 593-1462 for further information.

We look forward to the possibility of your family becoming a part of our community.

## What is Montessori?

Montessori is a **scientifically based education approach** that emphasizes independence, freedom within limits, and respect for a child's natural psychological, physical, and social development. This philosophy was developed by Italian physician and educator Dr. Maria Montessori.

Montessori education is based on the belief that all **children** are **unique individuals**, that they all have immense potential, that they want to learn and be busy. Therefore, the teacher needs to guide each child through the learning process by using materials that fit their specific needs and pace.

### FREEDOM OF CHOICE

Learning and well-being are improved when children have a **sense of control over their lives**. Although Montessori programs impose definite limits on this freedom, children are free to make many more decisions than children in traditional classrooms: what to work on, how long to work on it, with whom to work with, and so on.

### ORDER

Research in psychology has shown that order in the environment is very helpful in learning and development. Montessori classrooms are **prepared** and **organized**, both **physically** (in terms of lay-out) and **conceptually** (in terms of how the use of materials progresses).

### INTEREST

Research has proven that when individuals learn with the goal of only doing well on a test, their learning is superficial and quickly forgotten. **Children learn better when they are interested in what they are learning.**

### LEARNING FROM PEERS

Children in Montessori classrooms learn by **imitation models**, through peer tutoring and in collaboration with others. In mixed age classes, younger children learn from older ones by observing their work. Older children who are teaching younger children repeat and consolidate their knowledge and skills while obtaining social skills.

### MOVEMENT

Our brains develop in a world in which we “move and do”, not in a world in which we sit at desks. **Movement and cognition** are closely entwined. Montessori education, therefore, involves movement to enhance learning.

### CONTEXT

Children in Montessori programs **learn largely by doing**, rather than instruction-based learning. Through hands on learning, rather than just hearing and writing, their understanding is based on the context of actions and objects.

### TEACHER GUIDANCE

Montessori guides provide **freedom within limits**. They sensitively respond to children's needs, while maintaining high expectations. Guides carefully observe, assess, and encourage children to reach their highest potential.
